

25TH McMASTER UNIVERSITY **BLAST FURNACE IRONMAKING COURSE**

May 13 - 18, 2018 • Hamilton, Ontario, Canada

The course offers a unique opportunity to gain an in-depth view of blast furnace theory, operation, and best practices.

Lectures are given by acknowledged experts in their fields coming from diversified backgrounds and global experience. It is an invaluable course for managers, operators, engineers, researchers, or anyone involved in supplying equipment, materials or raw materials to the ironmaking industry.

Topics:

- Blast Furnace Design
- Reactions
- Day-to-Day operations
- Operation during challenging conditions
- Campaign extension strategies
- Safety aspects
- And many more

Further learning and networking opportunities are gained through open discussions, training exercises/simulations, and a plant tour of a local ironmaking facility.
